

ELLUMIGLOW

WIRE

THE BRIGHTEST EL WIRE ON THE PLANET

DIAMETER: 2.6MM

GLOWS: 360°

SPECS

- INPUT VOLTAGE: 40-200VAC
- TWISTING ANGLE: 30°/M
- OPERATING TEMPERATURE: -10°C TO +60°C
- STORAGE TEMPERATURE: +5°C TO 35°C

- INPUT FREQUENCY: 400-5000HZ
- BENDING DIAMETER: >10MM
- OPERATING HUMIDITY: <60%
- STORAGE HUMIDITY: <30%

- ELECTRICAL CURRENT: <150MA
- STRETCHING FORCE: <1.5KG
- LIFETIME: 2000-15000HRS
- STORAGE TIME: 2+ YEARS

BETTER ALL AROUND

- Brightness** - 150cd/m standard, 300-400cd/m - using MEGA EL Inverters (1-2x brighter than anyone)
- Voltage** - By combining Ellumiglow wire with MEGA EL Inverters the wire becomes safer to work with as the voltage is reduced compared to other inverters and wire.
- Bending** - Ellumiglow's core wire is about 2x the core of other wires. It is also made with a blend of silver and copper, allowing great flexibility but much added strength.
- Flexible** - Min. bending diameter of 10mm
- Lifetime** - Higher grade phosphor with no filler material. Ellumiglow's EL Wire is the only wire on the planet that does not include any fillers in the phosphor blend. This increases the shelf life, overall usable life, and allows it to glow brighter.
